Information Security and Data Protection

Background

With an ever increasing dependency on information systems for implementing service delivery, banks and financial institutions are implementing complex IT infrastructure. An advancement in technology has empowered banks to open multiple technology based services. However, this has also led to several payloads of risks and threats like online frauds, cybercrimes, and internal security breaches resulting in litigation and losses to banks. Considering the new data theft attacks, mobile based and cloud based products and services and increasing attacks by exploiting vulnerability of human elements by attackers, banks are facing challenges of loss of money and reputation as well. The need to fulfill privacy related compliances has further emphasized the importance of putting proper control mechanisms in order to safeguard customers' sensitive personal information. Thus, implementing information security and protecting customers' data is an ongoing process which focuses on applying and monitoring of control mechanism to ensure that information and related technology is protected at an appropriate level.

Against this backdrop, this programme is announced to empower banks in understanding various information security risks and how to build control mechanisms to manage them so that it will help in providing assurance to customers and complying with legal and regulatory requirements.

Target Group

- ❖ IT Operation Managers and IT Security managers
- ❖ Internal auditors
- ❖ Bank officers working in IT based delivery environment

Objectives

To provide insight on information security based on global standards. The programme will help:

- IT operation managers in understanding RBI guidelines and various standards, processes to be implemented that can result in reducing security incidents, maintaining controls and ensuring effectiveness of security controls,
- Internal auditors in understanding information security controls required and how to audit them based on design.
- Bank managers in understanding the basic information security control structure that need to be in place while executing banking operations using technology.

Course Content

- ❑ Information security and cyber security
- ❑ Changing landscape of cyber threats and attacks and countermeasures
- ❑ Risks and controls in Payment Systems
- ❑ Information security assessment and defining security implementation roadmap
- ❑ Information Security Policy, Procedure and Security Documents, Organization Structure
- ❑ Data protection requirements and models for data protections.
- ❑ Legal aspects of Data Protection and Privacy Laws in India
- ❑ IT Act and its implications on banking
- ❑ Data and information classification
- ❑ Data Governance
- ❑ Incident management and response
