Bank Management
Pune, India

Programme on Investment Credit to Agriculture and Allied Activities

Providing adequate and timely credit to the agriculture sector is vital and indispensable for the output and progress. This sector contributes significantly to the economic growth, employment, raw material for the industries, food supply, government revenue (through direct tax and indirect tax), and trade. The productivity derived from various farm and non-farm based activities are low, and there is immense need of enhancing the existing capacities and infrastructure. This, in turn requires continuous investment in the sector, particularly for high value agriculture and allied sectors like fruits and vegetables, milk and milk products, poultry products, fish and meat, ready to eat foods, etc. Such investments play a vital role in enhancing the income not only for the large farmers but also for the small and marginal farmers that constitute the major share of agriculture producers in developing nations.

Banks and financial institutions have a major role to play in connecting the agriculture production systems to other such systems of the economy and it can prove to be a win-win strategy for both banks/financial institutions and the sector. The sector requires a customised loan package to suit requirements of each area (e.g. horticulture, dairy, fisheries, farm mechanisation, etc.) and its expected return. The financial package may include the funding of acquisitions, development/expansion of agri-businesses, financial restructuring, capital expenditure, working capital requirements, as well as non-farming investments (i.e. value-adding investments and farm-housing). This requirement has always been a challenge, and as part of the decision making process, financing each area requires a comprehensive understanding of technicalities of the area and on-site due diligence investigation in order to gain a complete understanding of the business.

Against this backdrop, the captioned programme is designed primarily to equip the participants with necessary skills and perspectives on appraisal and financing of investment agriculture and allied agribusiness, such that they can draw maximum advantage of the available opportunities and deal with upcoming challenges in a better manner.

Objectives

- To learn various approaches, tools, and the intricacies of appraisal involved in providing investment credit to agriculture and allied activities
- To know and appreciate the various emerging investment opportunities for bank(s) in financing to agriculture and agribusiness
- To discuss and gain knowledge of the technicalities as well as processes involved in providing investment credit, and subsequent monitoring and follow up.

Pedagogy

The inputs will be delivered through a variety of methods including classroom lectures, interactive discussions, case studies, and experiential learning. The sessions will be delivered by a group of academic faculty complemented by experience sharing sessions by experienced bankers.

Programme Coverage

Day 1: Investment Credit Basics
