Programme on Technical Analysis for Dealers

Background

There is an increased use of technical analysis by trading desks of banks and financial institutions for understanding market movement and taking positions. Technical analysis has continually aided traders to make informed decisions based on study of market action, through use of charts. Along with this, there has been a refining of fundamental analysis and forecasting techniques to support technical tools.

In this context, there is a need for programmes giving comprehensive inputs and hands-on training in technical and fundamental analysis. The institute is offering this programme to help forex dealers to refine trading strategies using technical analysis, use technical analysis tools more appropriately, and use knowledge of fundamental analysis and econometric forecasting techniques to support technical analysis.

Objectives

- ➔ To provide comprehensive knowledge on methodology of modern technical analysis
- ➔ To give in-depth inputs on using technical analysis tools for trading
- ➔ To give in-depth inputs on using fundamental analysis and forecasting to support technical analysis
- ➔ To help traders choose best strategies on the basis of back testing

Pedagogy

The programme focuses on hands-on technical analysis of live charts for effective learning. There will be continued interactions with industry experts throughout the programme, especially during the hand-on sessions to help executives refine strategies for propriety trading.
