Programme on Information Security and Data Protection

Background

With the increase in adoption of digital services and related technologies, the need to plan and provide for cyber related risks and their potential impact, is becoming more prevalent. Some of the recent attacks on banks have not only impacted the confidentiality of the data but have also caused a reputation loss to the banks.

Data protection and data governance are foundations of a customer's trust in the banking sector, and are the critical enabling factors for innovation in a digital economy. The need to fulfill privacy related compliances has further emphasized the importance of putting proper control mechanisms in order to safeguard customers' sensitive personal information. Thus, implementing information security and protecting customers' data is an ongoing process which focuses on applying and monitoring of control mechanism to ensure that information and related technology is protected at an appropriate level.

Against this backdrop, this programme is announced to discuss various information security risks and how to build control mechanisms to manage them so that it will help in providing assurance to customers and complying with legal and regulatory requirements.

Target group

- ❖ Information Security Managers and IT Operation Managers
- ❖ IS Auditors/Internal auditors
- ❖ Bank officers working in IT based delivery environment

Objectives

The programme will help Bank official in understanding RBI guidelines and various standards, processes to be implemented that can result in reducing security incidents, and ensuring effectiveness of security controls in order to protect customer data
